The constant velocity universal joint (CV) allows smooth machine operation through a broad range of motion. These joints allow the machine to be designed with the input shaft in the best operating position and yet allow the operator to maneuver as needed. The CV delivers constant power by self-cancelling torque and speed fluctuations typically found in single cardan-type universal joints.

**PERFORMANCE BENEFITS**

- Sizes available from 21 HP (16 kW) at 540 RPM, 232 HP (173 kW) at 1000 RPM, up to 280 HP (209 kW) at 1300 RPM for 1000 hours of life at 10° total angle.
- Minimal vibration at high turn angles.
- Lightweight compact design for handling ease.
- Floating plates seal in lubrication and seal out contamination.
- Hardened spherical ball and socket provides long life.
- Telescoping shafts to meet application requirements.
- Available with patented Auto-Lok for ease of attachment.
- Articulated guard system provides full coverage at maximum angle.
- Easy to grease with guard system in position.
- Guard systems meet all international standards.
- Extended lubrication design available for reduced maintenance.
80° Constant Velocity Joint

**PATENTED COMPACT, ARTICULATED GUARD SYSTEM ANGLED UP TO 80°**

**PATENTED HARDENED, SEALED SPHERICAL BALL AND SOCKET**

**PATENTED GREASING SYSTEM**

**This Weasler product is designed and developed for:**

- Balers
- Manure Spreaders
- Mower Conditioners
- Rakes/Tedders
- Sprayer
- Mixer Feeders
