## Weasler Company Profile

**HIGHER VALUE  
SMARTER SOLUTIONS**

**Founded in 1951, Weasler Engineering, a member of the CentroMotion family of brands, is one of the world's leading manufacturers and distributors of mechanical power transmission products.**

### Markets served

Weasler supplies quality products to original equipment manufacturers in the agricultural, lawn and turf, and industrial markets. The Weasler brand is recognized for unsurpassed quality, on-time delivery, reliability and exceptional service, and the team proudly displays its Partner Level status in the John Deere Achieving Excellence Program, which is John Deere's highest supplier rating.

### A legacy of innovation

- Founder Anthony V. Weasler, who was known for his creativity and innovation, was awarded 15 patents throughout his career and inspired that same pioneering spirit in his employees.
- Collectively, 43 patents have been earned throughout Weasler history. Innovation genuinely is part of the Weasler culture, as the team has developed driveline solutions that have become the gold standard in the industry and shaped agricultural PTO driveshaft technology.
- In addition to numerous patents, Weasler also has earned countless ASABE product innovation awards for their products.
- These products include a 50- and 80-degree, wide-angle, constant velocity joint; Auto-Lok yokes for easy hook-up of a PTO drive shaft; TorQmaster friction clutches; TorQmaster automatic cam-type, cut-out clutches; the "E" (extended lubrication) cross kits; 77 Series heavy-duty drive shafts; and a high-torque automatic clutch.

### Extensive product offering

Today, Weasler's extensive product offering includes a wide range of PTO drive shaft products, with various telescoping styles:

- North American: Spline, rectangular and square shafting
- German: Lemon and star profile tubing
- Italian: Triangular profile tubing
- High speed drive shafts: Up to 3,600 rpm

A variety of torque limiters, high-end gearboxes and torsional dampers also are available.

### Committed expertise

At Weasler, a constant focus is placed on safety and continuous improvement. Years of experience, combined with a commitment to research and development, have allowed Weasler to develop the patented Easy Lock guard system, as well as the patented, fully enclosed, wide-angle guard and integral guard. These guard systems meet or exceed ASABE, ISO and EN standards and are available with CE Certification.

### Dedicated service

To provide the best possible customer service, Weasler maintains facilities worldwide. Corporate headquarters, as well as sales offices and manufacturing facilities, are in West Bend, Wisconsin, U.S.; with sales offices in the Netherlands and Brazil; and manufacturing facilities in Hungary and Brazil.
