

Weasler®

Higher value. Smarter solutions.

The increasing global demand for food has farmers finding new ways to increase productivity while reducing costly downtime. Through continuous development of new and improved products, we offer more design flexibility and maneuverability while safely transmitting the right amount of power when and where you need it.

From simple, low-power to the most rugged high-power projects, Weasler solutions help OEMs and aftermarket distributors worldwide overcome power transmission challenges. With our wide range of transmission solutions, we support farmers' efforts to keep moving with optimal productivity.

Founded in 1951 and now part of the CentroMotion™ family of brands, Weasler is widely recognized today for innovative and dependable drive train systems and components that offer unsurpassed quality, delivered on time, with exceptional customer service.
